

Customize Your Easter Treat Slider

Designed by Andrea Walford • Stampin' Up! Demonstrator • www.andreawalford.com

1. Use the template drawing below to determine your scoring dimensions – as I walk you through the steps, write the dimensions in the appropriate areas.
2. Measure the width of your treat and add $1/8$ " this becomes measurement A (A = width of treat + $1/8$ "")
3. Lay your treat flat on the table in front of you. Using a ruler, measure how deep it is and add $1/8$ ". So B = depth of treat + $1/8$ "
4. Dimension C = Dimension A – $3/4$ "
5. The total CS width = A + A + B + B + C
6. With your treat flat on the table in front of you, measure how high your treat is, add $1\ 1/2$ " to it.
7. Your **CS height** = treat height + $1\ 1/2$ "
8. Length of your ribbon = treat height + 6"
