

Key Chain Post it Note Holder Template

1. Split up your post it note pad into 3 or 4 sections (it's very hard to punch through the full thickness of the post-it note pad).
2. Measure your post it note pad – you want height, width and thickness.
3. Height of CS = height of post-it note pad + $\frac{1}{4}$ "
4. Width of CS = $(2 \times \text{Width of post-it note}) + \frac{1}{4}$ " + (thickness of post it note pad + $\frac{1}{16}$ ")
